1. The Soul of Pulse

Most apps make you go to them. Pulse comes to you , before you even know you need it.

Every single day, every single human being with a smartphone misses things that matter. A price drops while they sleep. An email with a deadline gets swiped away in the morning rush. A document they need is at home when they are standing at the counter. A number someone gave them on a phone call disappears because there was no pen. A meeting in 30 minutes and no time to prepare.

This is not because people are careless. This is because the world moves faster than any one human being can track , and every app we have built so far only adds to the noise.

Pulse is not another app. Pulse is the layer that sits above every app, reads every signal, connects every dot, and acts on your behalf , silently, intelligently, and always in your corner.

The Core Promise

Pulse is a personal life agent that lives on your phone. It watches everything that matters to you. It remembers everything about your life. It grows smarter every single day. And it shows up , with exactly what you need , before you even know to ask.

This is not a chatbot. This is not a search engine. This is not a notification app. This is the first product ever built that treats your life as a whole , not a collection of disconnected apps and services , and works to make every single day of it go better.

2. The Human Problems Pulse Solves

These are not hypothetical. These happen to real people , billions of them , every single day, in every country, at every income level.

The Price You Paid That You Shouldn't Have

You found the exact bus ticket, flight, product, or hotel you wanted. The price was too high. You bookmarked it and forgot. The price dropped at 2am, went back up by 6am. You paid full price the next day.

- Happens to every online shopper, every traveller, every person who has ever bought anything online
- The information existed. Nobody was watching it for you.

The Email That Cost You

Your phone buzzes 150 times a day. You swipe most of them. Buried in those swipes is a bank notice with a 3-day window. A university deadline. A government notice. A job application update. Gone.

- Happens to every working adult, every student, every person with an email account
- You didn't miss it because you were careless. You missed it because 149 other things were fighting for your attention.

The Interview You Walked Into Underprepared

One hour before your interview. No internet. Your notes are scattered across 5 apps, 3 WhatsApp chats, and a notebook. You walk in with half the preparation you needed.

- Happens to every job seeker, every student, every professional with an important meeting
- You had everything you needed. It just wasn't together when you needed it.

The Document That Wasn't There

You are at a government office, hospital, bank, or airport. They ask for a document. It is at home. The appointment is wasted. The trip is wasted. The day is wasted.

- Happens to millions of people every single week globally
- The document existed. It just wasn't with you.

The Number That Vanished

Someone calls you and shares a phone number, address, account number, or reference code during the conversation. You have no pen. The call ends. It is gone.

- Happens in every country, in every language, to every person who makes phone calls
- The information was right there. Nobody caught it.

The Health Detail You Forgot to Mention

You are at the doctor. They ask about your symptoms. You forget half of what you wanted to say. You forget when exactly the pain started. You forget what medication you took and when. You leave with an incomplete consultation.

- Happens to every patient globally, every single doctor visit
- Your own health history was inside you , but not organised for the moment you needed it.

The Pattern

Every single one of these problems has the same root cause , information existed, but nobody connected it to the right person at the right moment and took action. That is the exact gap Pulse was built to close.

3. The Complete Feature Universe

Every feature below is real, buildable, and designed to make a person's life genuinely better. Each one is useful alone. Together they create something that becomes impossible to live without.

3.1 Price Intelligence Engine

You see anything you want anywhere , Amazon, Flipkart, eBay, Myntra, SHEIN, MakeMyTrip, Redbus, Booking.com, any site in the world. You tell Pulse your target price or simply say 'watch this.'

- Monitors prices 24 hours a day across all platforms, not just one
- Alerts you the instant your target price is hit with the direct purchase link
- Shows full price history graph , is this drop real or a fake sale?
- Predicts whether the price will drop further or this is the lowest it will get
- Tells you the historically best time of year to buy that category
- Learns your buying patterns and proactively surfaces deals on things you want before you search for them
- Tracks flash sales, festival sales, clearance events across platforms automatically
- Notifies you when an out-of-stock item you wanted comes back

3.2 Email and Message Guardian

Every email, SMS, and message that arrives , Pulse reads it silently in the background. It identifies what matters and makes sure you never miss it.

- Detects deadlines, required actions, financial consequences, legal notices, appointments, government communications
- If you dismiss a notification without reading , Pulse holds it and resurfaces it before the deadline
- Explains every important email in two plain lines , what it wants and by when
- Drafts your response with one tap , you review and send

- Detects scam emails and phishing attempts before you open them
- Automatically extracts meeting invitations buried in email text and adds them to your calendar
- Tracks whether you have replied to important emails , nudges you if you haven't in 3 days
- Organises emails by urgency automatically , critical, action needed, informational, promotional
- Works across Gmail, Outlook, Yahoo, and any IMAP email account

3.3 Offline Life Briefing

Before any important moment , Pulse prepares a complete personalised briefing using everything you have ever saved. Fully offline. No internet needed. Ready before you ask.

- Job interview: company recent news, role requirements vs your resume, likely questions, your own notes
- Doctor appointment: your symptom history, current medications, questions to ask, relevant past reports
- Client meeting: past discussion summary, open action items, their company news, suggested agenda
- Exam: your own notes, key concepts, formula sheets, quick self-quiz , all offline
- Court hearing: relevant documents, key dates, what to expect, your lawyer's last communication
- Property visit: property documents, questions to ask, comparable prices in the area
- All briefing content pre-cached to device , works in basement, flight, rural area, anywhere
- Briefing delivered automatically 1 hour before the event without you asking

3.4 Document Vault and Intelligence

Every important document you own lives in Pulse. Not just stored , understood, monitored, and available exactly when you need it.

- Stores passport, driving licence, Aadhaar, PAN, voter ID, insurance, medical reports, prescriptions, property documents, contracts, certificates, bank statements, marksheets , everything
- Fully encrypted , nobody can access your documents except you
- OCR extracts text from every document , search by content not just filename
- Works fully offline , all documents cached on device
- Expiry intelligence , reminds you 6 months, 3 months, 1 month before passport, licence, insurance, PUC renewal

- Contract analysis , upload any agreement and Pulse highlights unusual clauses in plain language
- Organises documents by category automatically , identity, medical, financial, legal, educational, vehicle
- Share any document securely with a time-limited link , expires automatically
- Version history , keeps old versions when you upload a renewal

3.5 Call and Conversation Intelligence

Every phone call, voice note, and meeting recording , Pulse captures what matters so you never lose important information again.

- Captures phone numbers, addresses, account numbers, reference codes shared during calls automatically
- Displays extracted information immediately when the call ends
- Optional full call transcription for important calls
- Meeting recording transcription with summary and action item extraction
- Voice notes instantly converted to searchable text
- Search any word across every conversation and voice note you ever had
- Mid-call reminder flag , say a keyword during a call and Pulse timestamps it for review
- Caller identification enhancement , cross-references numbers against your contacts and known databases

3.6 Health Companion

Your complete health history in one place , tracked, understood, and working to keep you informed and ahead of problems.

- Log symptoms, medications, vitals , blood pressure, blood sugar, weight, sleep, steps, water intake
- Tracks trends over time , your haemoglobin over 2 years, your blood pressure pattern, your weight journey
- Medication reminders , never miss a dose, tracks your streak
- Menstrual cycle tracking with prediction, fertile window, PMS symptom forecasting
- Pre-appointment summary , shows the doctor exactly what changed since your last visit in one page
- Prescription storage and refill reminders , alerts you 5 days before you run out
- Stores all lab reports and medical images with trend analysis across visits
- Family health vault , track health records for your children, parents, elderly relatives
- Symptom checker , not a diagnosis, but enough context to decide whether to see a doctor
- Vaccination tracking , yours and your children's , with reminder for due dates

3.7 Financial Pulse

Complete visibility and control over your money , without spreadsheets, without manual entry, without surprises.

- Connect bank accounts and UPI , Pulse tracks every transaction automatically
- Categorises all spending automatically , food, transport, entertainment, bills, shopping, health
- Real-time fraud detection , unusual transaction at 2am wakes you up immediately
- Tracks all EMIs, subscriptions, and recurring payments , shows exactly what hits this month, this week, today
- Net worth dashboard , all accounts, investments, and assets in one real-time number
- Cash flow prediction , will you run out before next salary? Warned 2 weeks early
- Subscription audit , finds and lists every recurring charge including ones you forgot about
- Savings goals with automatic progress tracking , no manual updates needed
- Bill payment reminders with one-tap pay option
- Tax preparation assistant , categorises deductible expenses throughout the year
- Split expense tracking , who owes you, who you owe, across all your groups

3.8 Travel Companion

From the moment you plan a trip to the moment you return home , Pulse handles everything you would otherwise forget.

- Flight monitoring , delays, gate changes, cancellations detected before the airline emails you
- Automatic check-in 24 hours before your flight
- Luggage tracking on connecting flights
- All travel documents stored offline , visa, insurance, hotel, transport bookings
- Real-time currency conversion for your destination
- Automatic timezone adjustment for reminders and schedule
- Travel advisory monitoring , safety alerts for your destination
- Packing list generator based on destination weather, trip duration, and your past packing history
- Itinerary building from all your booking confirmation emails automatically
- Local emergency numbers, nearest embassy, hospital locations for any destination

3.9 Smart Learning Companion

Pulse helps you learn anything , faster, more effectively, and without overwhelming you.

- Create a learning goal , a skill, subject, language, certification , and Pulse builds a personalised daily plan
- Micro-lessons , 5 minutes of focused learning daily rather than overwhelming 4-hour courses
- Spaced repetition quiz system , resurfaces things you are about to forget at the scientifically optimal moment
- Tracks your learning streak and adjusts difficulty based on your performance
- Connects learning material to your real life , studying finance? Pulse connects concepts to your own financial data
- Exam countdown tracker with adaptive study intensity as the date approaches

3.10 Relationship Memory

Pulse helps you be the person who always remembers , not because you have a perfect memory, but because Pulse does.

- Remembers important details about people in your life , what they mentioned, their struggles, their wins
- Birthday and anniversary reminders with context , not just 'it's their birthday' but 'last year you gave them a book they loved'
- Follow-up reminders , you told someone you would send them something, Pulse reminds you if you haven't
- Meeting memory , before every conversation with someone, Pulse briefs you on what you discussed last time
- Gift suggestions based on what you know about the person
- Important life events tracker for people you care about , job changes, new babies, health situations

3.11 News and World Intelligence

Pulse filters the world's information down to only what actually matters to your life , and delivers it at the right moment.

- Monitors news related to your investments, companies you follow, industries you work in
- Delivers relevant news before meetings and interviews , not after
- Weather intelligence , not just forecast, but 'take an umbrella, your route will have rain at 3pm'
- Local event detection , concerts, festivals, traffic disruptions, strikes near you

- Regulatory changes that affect your business or profession
- Market movements relevant to your portfolio summarised in plain language

3.12 Smart Home and Device Integration

Pulse connects to your digital environment and learns your patterns to remove friction from your daily life.

- Connects to smart home devices , AC, lights, security camera, door locks
- Learns your patterns and automates routine actions without you programming them
- Electricity consumption monitoring , which devices cost the most, when to run them
- Security camera anomaly detection , unusual activity triggers immediate alert
- Vehicle integration , fuel level, service due dates, insurance and PUC expiry

3.13 The Context Engine , The Brain That Never Forgets

This is what makes Pulse different from everything else that exists.

Every other feature feeds the Context Engine. Every document, email, call, purchase, health metric, learning session, and conversation builds a living model of your life. Pulse uses this model to connect dots you would never connect yourself , and act on them before you even notice the connection.

Here is what the Context Engine does that no other product does:

- Your flight is tomorrow morning. Your calendar has a late meeting tonight. Pulse warns you: 'You have a 6am flight but a meeting until 10pm. You need to leave by 4:30am. Want me to set the alarm and book a cab now?'
- Your salary arrived today. Your rent is due in 3 days. Your EMI hits in 5 days. Pulse shows your real available money after all committed expenses before you spend a rupee
- You have an interview at a company. Pulse notices your LinkedIn has a skills gap against the job description and suggests adding a project
- You mentioned in a WhatsApp message 3 weeks ago that you want to visit Goa. Today flights to Goa drop 40%. Pulse remembers. Pulse alerts you
- Your child's vaccination is due in 2 weeks. Your calendar shows you travel that week. Pulse flags the conflict and suggests rescheduling
- You haven't exercised in 11 days. Your sleep quality has dropped. Pulse notices the pattern and gently asks if you are okay
- A news article about your investment company shows unusual CEO activity. You have shares. Pulse flags it before you hear it from anyone else

The Context Engine grows more powerful every single week. After 30 days Pulse knows you better than most apps ever will. After 6 months it knows your life well enough to proactively prevent problems before they happen , not just solve them after.

3.14 Proactive Nudges , Pulse Speaks Up Without Being Asked

These are the moments that make users fall in love with Pulse. Nobody asked for these. Pulse just noticed.

- 'You have a meeting in 40 minutes and current traffic makes it a 45-minute drive. Leave now.'
- 'You haven't replied to Haresh's message in 4 days. You mentioned you would send him the document.'
- 'Your resume hasn't been updated in 2 years. You mentioned last week you're thinking about switching jobs.'
- 'You've spent 43% more on food delivery this month than last month.'
- 'The weather at your destination tomorrow is 12°C. Your packing list doesn't include warm clothing.'
- 'This is the 3rd night this week you've slept less than 6 hours. Your meeting performance historically drops after this pattern.'
- 'Your car insurance renews in 18 days. Last year you found a 23% cheaper option by checking 3 alternatives.'
- 'You set a goal to read 12 books this year. You are currently 2 books behind schedule.'

3.15 Privacy Architecture , Why People Will Trust Pulse With Their Life

Non-negotiable principle

Pulse is built on a simple promise , your data is yours, your data serves you, and nobody else ever benefits from it. Ever.

- End-to-end encryption , nobody at Pulse, not even engineers, can read your data
- On-device processing wherever possible , most intelligence happens on your phone, not in the cloud
- You own your data completely , export everything in readable format at any time
- Delete everything permanently at any time , no retention, no backups kept without consent
- Zero advertising , ever , the business model is subscription, not attention
- Full transparency , Pulse explains exactly why it made each suggestion, no black box
- Granular permissions , turn off any feature, revoke any access, at any time

- Open audit , Pulse publishes its data handling practices and allows independent security audits

4. How Pulse Grows , The Intelligence That Never Stops

Most apps are the same on day 1 as they are on day 365. Pulse is fundamentally different on day 365 than it was on day 1. This is the most important thing about Pulse as a product and as a business.

4.1 The Learning Loop

1. You use Pulse , set a price watch, log a symptom, upload a document
2. Pulse observes the outcome , did the price drop, did the symptom recur, did you need that document
3. Pulse updates your personal model , learns your patterns, preferences, and priorities
4. Next time a similar situation occurs, Pulse acts faster and more accurately
5. The more you use Pulse, the more it knows. The more it knows, the more useful it becomes
6. After 6 months, Pulse anticipates your needs. After 1 year, it feels like it reads your mind

4.2 The Memory That Never Forgets

Pulse stores everything with context. Not just facts , the relationships between facts.

- It remembers that you always overspend in December and starts warning you in November
- It remembers that you get anxious before big presentations and prepares extra thoroughly
- It remembers that you prefer morning doctor appointments and suggests those by default
- It remembers that the last time you felt these symptoms it turned out to be dehydration and suggests that first
- It remembers that you always forget your charger when you pack quickly and adds it to every packing list

4.3 The Personalisation That Deepens

Pulse starts as a general life agent. Over time it becomes YOUR life agent , one that nobody else could use as effectively because it is shaped entirely around who you are.

- Your notification preferences , Pulse learns what time you like to hear what kind of news
- Your decision patterns , Pulse learns when you need more information versus when you need a push
- Your communication style , Pulse learns how you prefer to be spoken to
- Your stress patterns , Pulse learns what situations cause you anxiety and prepares earlier for them
- Your financial risk tolerance , Pulse calibrates financial suggestions to your actual comfort level

5. How Pulse Wins and Keeps Every User's Heart

Features get people to download an app. Emotions get people to never leave.

5.1 The First Wow Moment , Day 1

Every new user needs to feel Pulse's value within the first 10 minutes. This is engineered deliberately.

- Onboarding is a conversation not a form , Pulse asks you what matters most in your life right now
- Within 5 minutes it has set up a price watch, scanned your recent emails for anything urgent, and stored your first document
- Within 10 minutes it has already caught something you would have missed , a deadline, a deal, a detail
- The first notification Pulse sends is almost always something the user genuinely needed , this is the hook

5.2 The Trust Moment , Day 7

By day 7 Pulse has watched over the user through a full week. It has caught something real. It has saved them something real. This is when they start telling people about it.

5.3 The Can't-Leave Moment , Day 30

After 30 days the user's documents are all there. Their health history is building. Their financial patterns are tracked. Their personal model is forming. The idea of switching to anything else means starting over completely. They are not leaving.

5.4 The Evangelist Moment , Day 90

After 90 days Pulse has done something genuinely remarkable for the user. Caught a fraud. Found a deal that saved them significant money. Prepared a briefing that helped them nail an interview. Reminded them of a health pattern that turned out to be important. These users become unpaid advocates. They tell everyone.

The Retention Principle

Pulse gets more valuable every single day. There is no other product where the value proposition grows continuously with time. This is the rarest and most powerful form of product-market fit.

6. Technical Architecture

Layer	Technology	Purpose
Agent Brain	Google Cloud Agent Builder + Gemini 2.5 Pro	Orchestrates all agent tasks, reasons over context, plans multi-step actions
Life Memory	MongoDB Atlas	Stores everything about the user , profile, history, documents, patterns, preferences
Document Search	MongoDB Atlas Vector Search	Semantic search across all stored documents , finds by meaning not just keyword
Partner MCP	MongoDB MCP Server	Agent reads and writes to Atlas in real time via MCP tools
Mobile App	React Native	Single codebase for iOS and Android
Offline Sync	MongoDB Realm	On-device database that syncs to Atlas when online , enables all offline features

Notifications	Firebase Cloud Messaging	Instant alerts across all devices
Email Integration	Gmail API + IMAP	Reads emails across all providers
Backend API	Node.js + Google Cloud Run	Serverless, scales automatically, cost-efficient
Authentication	Google OAuth 2.0	Frictionless sign-in
Price Monitoring	Scheduled Cloud Functions + Puppeteer	Checks prices every 30 minutes across platforms
Voice Processing	Google Speech-to-Text + Gemini	Call transcription and voice note conversion
Financial Data	Plaid + Open Banking APIs	Secure bank transaction access across countries

6.1 How MongoDB Powers Everything

MongoDB is not just where Pulse stores data. MongoDB is the reason Pulse can be what it is. The schema-flexible document model means Pulse can store anything about a human life , structured, unstructured, evolving , without rebuilding the database every time the product grows.

- User Profile Collection: living document that grows with every interaction, every preference, every learned pattern
- Documents Collection: with vector embeddings for semantic search , find any document by describing what you remember about it
- Price Watches Collection: active monitoring targets with full price history and prediction metadata
- Email Intelligence Collection: processed email metadata, deadlines, urgency scores, action status
- Health Records Collection: symptoms, medications, vitals, reports , time-series with trend analysis
- Financial Transactions Collection: categorised spending, recurring payments, cash flow projections
- Event Briefings Collection: pre-generated offline briefings cached to device via Realm
- Call Intelligence Collection: transcripts, extracted entities, searchable by any content
- Relationship Memory Collection: people you know, details about them, interaction history
- Context Engine Collection: cross-domain patterns, predictions, personalisation weights

7. How Pulse Reaches Everyone

Pulse is designed to be useful to every kind of person , from someone who just wants to track a price, to a family managing their collective life, to a small business owner running a team. The product scales with the user's life.

7.1 Pulse Free , For Everyone

The free version of Pulse is not a crippled demo. It is a genuinely useful product that solves real problems from day one. The goal is simple , make Pulse so valuable in its free form that people tell their friends, and feel the pull to go deeper.

- Price watching for products and tickets
- Email guardian with deadline detection
- Document vault for essential documents
- Offline briefing for upcoming events
- Basic call intelligence

7.2 Pulse Personal , For Power Users

For the person who wants Pulse to know everything about their life. Unlimited across every feature. The full context engine running at maximum depth. This is where Pulse becomes a true life companion.

- Everything in Free, unlimited
- Full health companion with trend analysis
- Complete financial tracking and cash flow intelligence
- Full travel companion with automatic itinerary building
- Learning companion with spaced repetition
- Relationship memory fully activated
- Proactive nudges at full depth

7.3 Pulse Family , For Households

A family is not a collection of individuals , it is a system. Pulse Family treats it that way. Every member has their own private space, but the family shares what matters together.

- Up to 5 family members each with full Personal access
- Shared document vault , find any family document instantly

- Family health tracking , parents monitor children's vaccinations, elderly parents' medications
- Shared financial overview , household spending, shared goals, joint expenses
- Family calendar with Pulse intelligence across all members
- Child safety features , location awareness, safe route monitoring

7.4 Pulse for Teams , For Small Businesses and Freelancers

Small teams have the same chaos as individuals , multiplied. Pulse for Teams brings the same proactive intelligence to the way people work together.

- Shared meeting intelligence , everyone walks into every meeting fully briefed
- Team deadline tracking , nothing falls through the cracks across the team
- Client relationship memory , whoever speaks to the client knows everything
- Shared document vault for team resources
- Project context engine , Pulse understands the history of every project

7.5 Pulse Enterprise , For Organisations

For large organisations that want to give every employee a personal life agent. Custom integration with internal systems. Full API access. Dedicated support. Built to the organisation's specific security and compliance requirements.

8. Why Nobody Can Beat Pulse

The Combination is the Moat

Any individual feature of Pulse can be replicated. The combination of all features sharing one unified personal context layer , where every feature makes every other feature smarter , cannot be replicated quickly. It takes years of data and millions of users to recreate what Pulse builds for each individual user over time.

8.1 The Data Flywheel

The more you use Pulse, the smarter it gets. The smarter it gets, the more you use it. The more you use it, the harder it is to imagine life without it. This flywheel takes time to build and cannot be shortcut.

8.2 The Switching Cost

After 6 months of using Pulse, switching to anything else means losing your entire document vault, your health history, your financial patterns, your relationship memory, your learning progress, your price watch history , years of context that made Pulse feel like it knows you. Nobody does that voluntarily.

8.3 The Trust Barrier

Trust for a product like Pulse is earned slowly and lost instantly. Once Pulse has earned a user's trust , through consistent accuracy, zero privacy violations, and genuine value , competitors face an almost impossible challenge. They are not just competing with features. They are competing with a trust relationship built over months.

8.4 The Network Effect

Shared document vaults, split expense tracking, relationship memory, family health tracking, team intelligence , every feature that involves more than one person creates network effects. The more people in your life who use Pulse, the more powerful it becomes for you.

9. Hackathon Strategy , How We Win

Judging Criterion	How Pulse Scores	Rating
Move Beyond Chat	Pulse never just answers. It watches, acts, and delivers without being asked	10/10
Multi-Step Mission	Every feature involves multiple autonomous steps: detect, reason, prepare, deliver, learn	10/10
Partner Integration	MongoDB is the soul of Pulse , not surface level, it is the entire memory and intelligence layer	10/10
Real World Problem	Every human with a smartphone has experienced these problems personally	10/10
Potential Impact	4.5 billion smartphone users globally. Every age, every country, every income level	10/10
Quality of Idea	No product today combines proactive watching,	9/10

	personal memory, and offline capability as one agent	
Design	One clean dashboard. Everything in one place. Zero learning curve.	9/10

10. The One Thing That Wins

Pulse is the first product ever built that treats your entire life as one connected story , and makes sure nothing important in that story gets missed.

Every feature is useful alone.
Together they create something people will never give up.
That is Pulse.
